- * (2) M10 Bolts

PARTS / TOOLS NEEDED TO COMPLETE INSTALLATION:

- * Basic simple hand tools.
 - * 3mm Allen wrench
 - * 15mm Wrench
 - * 13mm Wrench

APPROXIMATE INSTALL TIME: 45 min – 1 hour

INSTALLATION:

***Note:** These directions apply to both Lazer Star Lights product lines – LX LED and Dominator LED (formerly known as PreRunner LED). Dominator LED installation may vary slightly. Representative images shown are using the Dominator LED product line.

1. **Loosely** clamp the 1.75" tube clamps around both left and right upper A-Pillar just below the roof (see photo for placement reference) with the flat mounting surface facing forward.
2. Remove the "U" bracket from two of your bottom mounts from your light bar.
 - * Save hardware for Step 5.
 - * Store unused saddle brackets for possible future use.
 - * Store any excess bottom mounts for possible future use.
3. **Loosely** install the bottom mounts (without the "U" bracket) on to the left and right side of the light bar.
4. Using the M10 bolts, **loosely** bolt the fabricated brackets to the flat mounting surface of the tube clamps.
5. Using the given hardware saved from the saddle bracket, **loosely** bolt the light bar to the fabricated brackets.

- This may require sliding the bottom mounts to position them correctly.
- 6. Ensure that the light is centered, adjust where necessary, and tighten down all bolts.
 - Order of tightening down bolts: Bottom sliding track mount to light, fabricated bracket to bottom mount of light bar, fabricated bracket to tube clamp, finally, tube clamp around roll cage.

Use and Care Tips:

- * Keep away from hot or moving parts.
- * Regularly check for loose hardware.
- * Keep any unused parts for possible future use.

Installation is Complete.
