Part # 592751 YXZ Bumper Mount Bracket

GENERAL NOTES:

- * These instructions are also available on our website: lazerstarlights.com. Please check our website before you begin installation for any updated instructions as well as additional photos for your reference.

PARTS LIST:

- * (2) Yamaha YXZ Bumper Mount Bracket (PN: 592751)
- * (2) M8 x 16mm Bolt
- * (2) M8 Washer
- * (2) M8 Nut

PARTS / TOOLS NEEDED TO COMPLETE INSTALLATION:

- * 13mm Wrench

APPROXIMATE INSTALL TIME: 15 min

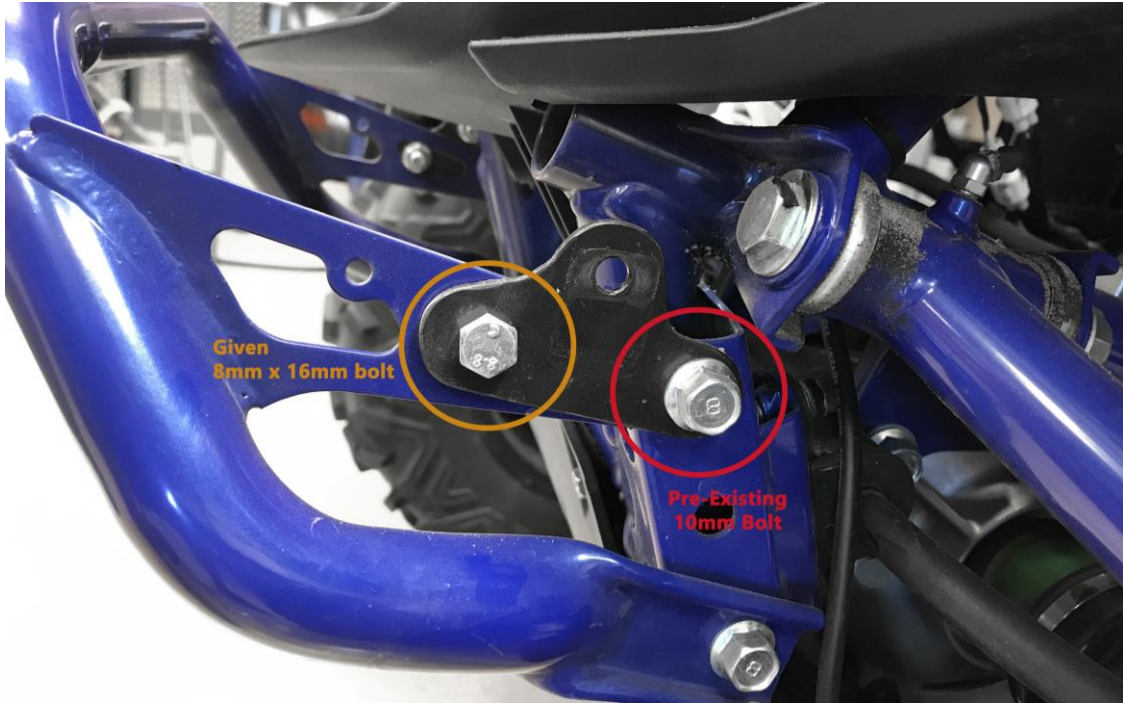

BRACKET / LIGHTBAR INSTALLATION:

***Note:** These directions apply to both Lazer Star Lights product lines – LX LED and Dominator LED (formerly known as PreRunner LED). LX LED installation will vary slightly. Representative images shown are with the Dominator LED line.

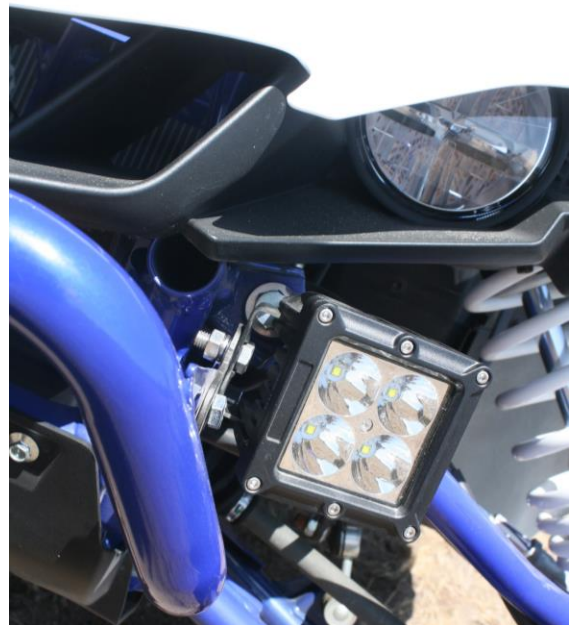

***Note:** A light bar is **not** recommended to be installed with this bracket. We recommend **cube/utility lights** from our Dominator LED or LX LED line be installed on the YXZ Bumper Mount Bracket.

1. Remove the upper pre-existing 10mm bolt that attaches the bumper to the chassis. This bolt will be re-used in Step 2.

2. Install the YXZ bumper bracket on the outside of the bumper brace with the given hardware and the pre-existing hardware, as shown. Secure bolts.

3. Install your Lazer Star Light to the open hole on the bracket. (If you are using LED lights from our LX LED line, exchange the supplied M8 x 16mm bolt with the long mounting bolt that comes with the LX cubes).

4. Repeat Steps 1-3 on opposite side.
